EXPORT CATALOGUE

ABOUT AZZA SEAFOOD

We operate as a Mauritanian–Hungarian partnership, combining local direct sourcing with European quality control standards to ensure consistent, reliable quality throughout the entire supply chain.

Operating from the Nouadhibou Free Trade Zone, the center of Mauritania’s maritime industry, we source premium seafood products from the Atlantic Ocean FAO 34 area, working closely with trusted artisanal fishermen and industrial fishing vessels.

By maintaining control over the entire supply chain process, from catch to processing, we guarantee full traceability, freshness, and reliable delivery for our partners.

OUR ON-SITE OPERATIONS

DIRECT PARTNERSHIPS

Our on-site team works closely with trusted coastal vessels and maintains strong relationships with local artisanal captains. This ensures rapid handling, immediate icing on board, and delivery to our facilities within hours of catch.

TRACEABILITY

From catch to final packaging, every step is carefully monitored and recorded, ensuring full transparency and consistent quality.

FACTORY CAPABILITIES

- ✓ Blast Freezing: 3 tunnels (-40°C)
- ✓ Storage: 1,500-ton cold store
- ✓ Hygiene: EU approved & HACCP

FAO 34

The Mauritanian coastline is home to one of the most productive marine ecosystems in the world. Driven by a permanent upwelling phenomenon, cold, nutrient-rich Atlantic currents rise to the surface, creating ideal conditions for abundant marine life.

ENVIRONMENTAL STEWARDSHIP

We strictly respect biological rest periods and apply responsible fishing practices, including selective mesh sizes to minimize bycatch and protect marine resources.

While these are the core products we specialize in,
our sourcing capabilities extend across the full
range of seafood species available within the FAO
34 fishing zone.

For any additional products not listed in this
catalogue, we are able to provide customized
sourcing solutions tailored to our partners'
requirements.
